Silane coupling agent MTES

Introduction:

Chemical Name : Methyltriethoxysilane

CAS NO. : 2031-67-6

Molecular Formula: $\text{CH}_3\text{Si}(\text{OCH}_2\text{CH}_3)_3$

Typical Physical Properties:

Determined on commercial material whose properties may vary within the specification limits.

Physical Form	Clear liquid
Specific Gravity at 20°C	0.870-0.910
Refractive Index, nD 25°C	1.3812-1.3852
Purity, %	Min 99.0
Boiling Point	143.5°C
Soluble in ethanol, gasoline and benzene.	

Applications

Used in the synthesis of cross-linked resins, or in the treatment of various Inorganic fillers
